SUMMARY

Final-year Software Engineering student aspiring to become a Solution Architect who designs and builds practical, maintainable solutions. Focused on clean system logic and applying AI to support problem-solving, implementation, and testing.

EDUCATION

Sai Gon University

Software Engineering

2023 – Present

GPA: 3.65/4.0

CERTIFICATES AND AWARDS

- **TOEIC:** 905 (Listening: 495; Reading: 410).
- **Academic Scholarships:** Received 6 academic scholarships from Sai Gon University.

SKILLS

Languages: Java, C#, JavaScript/TypeScript, Python, PHP

Web & Mobile: Spring Boot, Express.js, React, Next.js, React Native, Flutter, Tailwind CSS

Data & Messaging: PostgreSQL, MySQL, Supabase, Kafka

Tools & DevOps: Git, Docker, Kubernetes, AWS, GitHub Actions, Jest

EXPERIENCE

FWD Vietnam Technology Company (FWD VTC)

Jun 2026 – Sep 2026

Software Developer Intern

- Identified gaps in development requirements, clarified them with the team, and proposed solution plans; after leader approval, produced technical documentation and implemented the solutions using AI-assisted workflows.
- Applied structured problem-solving to technology evaluation and modular application design with React Native.
- Learned to apply AI Agent platform to design UI/UX and use structured AI Agent workflows to develop application.
- Strengthened debugging and testing skills by improving sheet rendering and validating core flows with Jest, TypeScript checks, and Android testing.

PROJECTS

Instory – Social Media Platform [GitHub] [Live Demo]

Mar 2026 - May 2026

ASP.NET, React.js, Tailwind, PostgreSQL, SignalR, AWS, GitHub Actions, Docker

- Built a social platform for sharing posts and stories, with real-time chat, notifications, and an admin moderation dashboard.
- Implemented Google OAuth, OTP verification, and S3 media storage; deployed on AWS EC2 with Docker and GitHub Actions, achieving 60% test coverage.

SmartDoc RAG – Intelligent Document Q&A System [GitHub]

Mar 2026 - May 2026

FastAPI, React.js, LangChain, FAISS, BM25, EasyOCR, Ollama, SQLite

- Built a RAG/CoRAG document Q&A system with OCR and local LLM inference, helping users find answers in document content.
- Implemented hybrid search and query rewriting to retrieve relevant context, with web search when document context is insufficient.

Medify – Microservices Medical Platform [GitHub]

Oct 2025 - Dec 2025

Next.js, Spring Boot, PostgreSQL, Tailwind, JWT, Docker, Kubernetes, Kafka

- Developed Medify as a multi-tenant clinic management platform, aiming to help clinics avoid the cost of building their own systems.
- Built a multi-tenant scheduling engine to manage doctor availability and automate patient appointment bookings.
- Designed a microservices architecture with an API Gateway and Docker/Kubernetes deployment configuration.
