SUMMARY

Driven final-year Information Technology student at Saigon University with a strong foundation in computer science and a passion for building practical, clean-coded solutions. Proven ability to quickly master new technologies and approach complex logic with a strong problem-solving mindset. Eager to contribute to high-impact projects while gaining hands-on industry experience.

EDUCATION

Sai Gon University <i>Information Technology</i>	2023 – Present <i>Current GPA: 3.65/4.0 — 8.67/10</i> Awarded 6 academic scholarships to date
--	---

SKILLS

Languages: Java, C#, JavaScript/TypeScript, Python, PHP
Web & Mobile: Spring Boot, Express.js, React, Next.js, React Native, Flutter, Tailwind CSS
Data & Messaging: PostgreSQL, MySQL, Supabase, Kafka
Tools & DevOps: Git, Docker, Kubernetes, AWS, GitHub Actions, Jest

EXPERIENCE

FWD Vietnam Technology (FWD VTC) <i>Software Developer Intern</i>	Jun 2026 – Sep 2026
- Evaluated and selected React Native and TypeScript for learning piano application on mobile, organizing MIDI processing, playback, and scoring into reusable modules. - Built a MIDI to MusicXML pipeline handling measures, chords, rests, and ties, using OpenSheetMusicDisplay (OSMD) to render structured piano notation. - Optimized sheet rendering by separating static notation from playback and feedback updates, avoiding unnecessary score reloads and reducing flicker. - Integrated Supabase Auth, PostgreSQL row-level security, and offline practice-history synchronization; validated core flows with Jest, TypeScript checks, and Android testing.	

PROJECTS

Instory – Social Media Platform [GitHub] <i>ASP.NET, React.js, Tailwind, PostgreSQL, SignalR, AWS, GitHub Action, Docker</i>	Mar 2026 - May 2026
- Built a full-stack Instagram clone with posts, stories, trending hashtags, friend requests, and an admin moderation dashboard. - Implemented real-time chat and notifications, AWS S3 media uploads, Google OAuth, and OTP verification. - Deployed on AWS EC2 via a GitHub Actions CI/CD pipeline and Docker, 60% test coverage.	
SmartDoc RAG – Intelligent Document Q&A System [GitHub] <i>FastAPI, React.js, LangChain, FAISS, BM25, EasyOCR, Ollama, SQLite</i>	Mar 2026 - May 2026
- Engineered a RAG and CoRAG Q&A system , processing documents via EasyOCR. - Implemented Hybrid Search, Cross-Encoder evaluation, query rewriting, and web search for low-context queries. - Integrated SQLite for chat history, parallel pipelines, and local LLM inference.	
Medify – Microservices Medical Platform [GitHub] <i>Next.js, Spring Boot, PostgreSQL, Tailwind, JWT, Docker, Kubernetes, Kafka</i>	Oct 2025 - Dec 2025
- Engineered a multi-tenant scheduling engine that automates doctor availability and patient bookings - Architected a high-scalability microservices system using API Gateway to orchestrate services Cloud-native infrastructure, designed for cloud deployment via Docker and Kubernetes.
